Manual Use

Chauvet authorizes its customers to download and print this manual for professional information purposes only. Chauvet expressly prohibits the usage, copy, storage, distribution, modification, or printing of this manual or its content for any other purpose without written consent from Chauvet.

Document Printing

For best results, print this document in color, on letter size paper (8.5 x 11 in), double-sided. If using A4 paper (210 x 297 mm), configure the printer to scale the content accordingly.

Intended Audience

Any person installing, operating, and/or maintaining this product should completely read through the guide that shipped with the product, as well as this manual, before installing, operating, or maintaining this product.

Disclaimer

Chauvet believes that the information contained in this manual is accurate in all respects. However, Chauvet assumes no responsibility and specifically disclaims any and all liability to any party for any loss, damage or disruption caused by any errors or omissions in this document, whether such errors or omissions result from negligence, accident or any other cause. Chauvet reserves the right to revise the content of this document without any obligation to notify any person or company of such revision, however, Chauvet has no obligation to make, and does not commit to make, any such revisions. Download the latest version from www.chauvetprofessional.com.

Document Revision

This is revision 6 of the Maverick Storm 2 BeamWash User Manual. Go to www.chauvetprofessional.com for the latest version.

1. Before You Begin

What Is Included

- Maverick Storm 2 BeamWash
- Seetronic Powerkon IP65 Power Cable
- 2 Omega Brackets with mounting hardware
- Quick Reference Guide

Claims

Carefully unpack the product immediately and check the container to make sure all the parts are in the package and are in good condition.

If the box or the contents (the product and included accessories) appear damaged from shipping, or show signs of mishandling, notify the carrier immediately, not Chauvet. Failure to report damage to the carrier immediately may invalidate a claim. In addition, keep the box and contents for inspection.

For other issues, such as missing components or parts, damage not related to shipping, or concealed damage, file a claim with Chauvet within 7 days of delivery.

Text Conventions

Convention	Meaning
1–512	A range of values
50/60	A set of values of which only one can be chosen
Settings	A menu option not to be modified
<ENTER>	A key to be pressed on the product's control panel

Symbols

Symbol	Meaning
	Critical installation, configuration, or operation information. Not following these instructions may make the product not work, cause damage to the product, or cause harm to the operator.
	Important installation or configuration information. The product may not function correctly if this information is not used.
	Useful information.

Any reference to data or power connections in this manual assumes the use of Seetronic IP rated cables.

The term “DMX” used throughout this manual refers to the USITT DMX512-A digital data transmission protocol.

Safety Notes

Read all the following safety notes before working with this product. These notes contain important information about the installation, usage, and maintenance of this product.

This product contains no user-serviceable parts. Any reference to servicing in this User Manual will only apply to properly trained, certified technicians. Do not open the housing or attempt any repairs.

All applicable local codes and regulations apply to proper installation of this product.

- The luminaire is intended for professional use only.
- The luminaire should be positioned so that prolonged staring into the luminaire at a distance closer than 17.7ft (5.4 m) is not expected.
- If the external flexible cable or cord of this luminaire is damaged, it shall be replaced by a special cord or cord exclusively available from the manufacturer or its service agent.
- The light source contained in this luminaire shall only be replaced by the manufacturer or its service agent or a similar qualified person.
- **CAUTION:**
 - This product's housing may be hot when operating. Mount this product in a location with adequate ventilation, at least 20 in (50 cm) from adjacent surfaces.
 - When transferring the product from extreme temperature environments, (e.g., cold truck to warm humid ballroom) condensation may form on the internal electronics of the product. To avoid causing a failure, allow the product to fully acclimate to the surrounding environment before connecting it to power.
 - Flashing light is known to trigger epileptic seizures. User must comply with local laws regarding notification of strobe use.
- **ALWAYS:**
 - Disconnect from power before cleaning the product or replacing the fuse.
 - When using an IP65-rated product in an outdoor environment, use IP65- (or higher) rated power and data cable.
 - Replace and secure IP-rated protective covers to all power, data, USB, or other ports when not in use.
 - Replace the fuse with the same type and rating.
 - Use a safety cable when mounting this product overhead.
 - Connect this product to a grounded and protected circuit.
- **DO NOT:**
 - Open this product. It contains no user-serviceable parts.
 - Look at the light source when the product is on.
 - Leave any flammable material within 20 cm of this product while operating or connected to power.
 - Connect this product to a dimmer or rheostat.
 - Operate this product if the housing, lenses, or cables appear damaged.
 - Submerge this product (adhere to standards for the published IP rating). Regular outdoor operation is fine.
 - Permanently install outdoors in locations with extreme environmental conditions. This includes, but is not limited to:
 - Exposure to a marine/saline environment (within 3 miles of a saltwater body of water).
 - Locations where normal temperatures exceed the temperature ranges in this manual.
 - Locations that are prone to flooding or being buried in snow.
 - Other areas where the product will be subject to extreme radiation or caustic substances.
- ONLY use the hanging/mounting bracket to carry this product.
- The maximum ambient temperature is 113 °F (45 °C). Do not operate this product at higher temperatures.
- The minimum startup temperature is -4°F (-20°C). Do not start the product at lower temperatures.
- The minimum ambient temperature is -22°F (-30°C). Do not operate the product at lower temperatures.
- To eliminate unnecessary wear and improve its lifespan, during periods of non-use completely disconnect the product from power via breaker or by unplugging it.
- In the event of a serious operating problem, stop using immediately.

If a Chauvet product requires service, contact Chauvet Technical Support.

Before You Begin

FCC Statement of Compliance

This device complies with Part 15 Part B of the FCC rules. Operation is subject to the following two conditions:

1. This device may not cause harmful interference, and
2. This device must accept any interference received, including interference that may cause undesired operation.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

RF Exposure Warning for North America, and Australia

Warning! This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with a minimum distance of 20cm between the radiator and your body. This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.

Expected LED Lifespan

Over time, use and heat will gradually reduce LED brightness. Clustered LEDs produce more heat than single LEDs, contributing to shorter lifespans if always used at full intensity. The average LED lifespan is 40,000 to 50,000 hours. To extend LED lifespan, maintain proper ventilation around the product, and limit the overall intensity.

2. Introduction

Description

The Maverick Storm 2 BeamWash is a powerful and compact IP65 moving head with a zoom range capable of wide 53.1° washes and intense tight 3.6° beams. An incredibly bright output of nearly 10,000 lumens makes the Maverick Storm 2 BeamWash well-suited for any application or venue size. Pixel-mapping effects, including a 12-zone RGB LED outer ring, add to the unit's versatility; and a virtual gobo wheel with background colors creates an array of immersive atmospheric effects. The RDM-enabled unit features 16-bit dimming and can be controlled via DMX, WDMX, Art-Net™, sACN, and Arkaos Kling-Net.

Features

- Full-featured, compact IP65 BeamWash with (19) 50 w RGBW LEDs that zoom down to 3.6 degrees to produce powerful, tight aerial beams and out to 53.1 degrees for wide washes and individual pixel control for stunning eye candy effects
- 3.6° to 55° zoom range
- 12 zone pixel-mappable RGB LED outer ring under a stealth filter for added effect possibilities
- Incredibly bright! Almost 10,000 lumens!
- 16-bit dimming of master dimmer and individual colors for smooth control of fades
- Fully pixel mappable LEDs
- Built in LED macros with foreground and background control for easy generation of pixel effects
- Unique lens design for excellent color blending and tight beam effects
- Fast, smooth pan and tilt movement
- User selectable full output 7500 K calibrated white
- Selectable PWM settings for camera operation
- 6 distinct dimming modes for advanced control
- Simple and complex DMX channel profiles for programming versatility including dual mode operation.
- 5-pin DMX input/output connections
- RDM Enabled for remote addressing & trouble shooting
- Easy to read OLED display with simple, effective menu options
- USB-C port for convenient software uploads

Product Overview

Product Dimensions

3. Setup

AC Power

The Maverick Storm 2 BeamWash has an auto-ranging power supply and it can work with an input voltage range of 100 to 240 VAC, 50/60 Hz.

To determine the product's power requirements (circuit breaker, power outlet, and wiring), use the current value listed on the label affixed to the product's back panel, or refer to the product's specifications chart.

The listed current rating indicates the product's average current draw under normal conditions.

- **Always connect the product to a protected circuit (a circuit breaker or fuse). Make sure the product has an appropriate electrical ground to avoid the risk of electrocution or fire.**
- **To eliminate unnecessary wear and improve its lifespan, during periods of non-use completely disconnect the product from power via breaker or by unplugging it.**

Never connect the product to a rheostat (variable resistor) or dimmer circuit, even if the rheostat or dimmer channel serves only as a 0 to 100% switch.

AC Plug

The Maverick Storm 2 BeamWash comes with a power input cable terminated with a Seetronic Powerkon A connector on one end and an Edison plug on the other end (U.S. market). If the power input cable that came with the product has no plug, or if the plug needs to be changed, use the table below to wire the new plug.

Connection	Wire (U.S.)	Wire (Europe)	Screw Color
AC Live	Black	Brown	Yellow or Brass
AC Neutral	White	Blue	Silver
AC Ground	Green/Yellow	Green/Yellow	Green

Fuse Replacement

1. Disconnect this product from the power outlet.
2. Using a flat-head screwdriver, unscrew the fuse holder cap from the housing.
3. Remove the blown fuse and replace with another fuse of the same type and rating (F 20 A, 250 V).
4. Screw the fuse holder cap back in place and reconnect power.

Signal Connections

The Maverick Storm 2 BeamWash can receive a DMX, Art-Net™, sACN, or Kling-Net signal. The Maverick Storm 2 BeamWash has 2 Neutrik RJ45 through ports, and 5-pin DMX in and out ports. If using other compatible products with this product, each can be controlled individually with a single controller.

Control Personalities

The Maverick Storm 2 BeamWash uses a 5-pin DMX data connection, WDMX, Art-Net™, sACN, or Kling-Net for its control personalities:

Single Control	Dual Control Movement	Dual Control Pixels
Basic (31-channel)	Basic (11-channel)	Basic (93-channel)
Standard (143-channel)	Standard (34-channel)	Standard (112-channel)
Advanced (263-channel)	Advanced (45-channel)	Advanced (224-channel)
Tour (325-channel)		
Basic2 (37-channel)		
Busk (19-channel)		
Basic3 (37-channel)		

In Dual Control mode, the Movement protocol and the Pixels protocol cannot be the same.

- Refer to the [Operation](#) chapter to learn how to configure the Maverick Storm 2 BeamWash to work in these personalities.
- The [Control Channel Assignments and Value](#) section provides detailed information regarding the control personalities.

If more information is needed about DMX standards or the DMX cables required to link this product to a DMX controller, download the DMX Primer from the Chauvet website:
www.chauvetprofessional.com.

DMX Linking

The Maverick Storm 2 BeamWash can be linked to a DMX controller using a 5-pin DMX connection or a WDMX connection. For more information about DMX, read the DMX primer at:

https://www.chauvetprofessional.com/wp-content/uploads/2016/06/DMX_Primer.pdf.

Art-Net™ Connection

Art-Net™ is an Ethernet protocol that uses TCP/IP which transfers a large amount of DMX512 data using a Neutrik RJ45 connection over a large network. An Art-Net™ protocol document is available from

www.chauvetprofessional.com.

Art-Net™ designed by and copyright Artistic Licence Holdings Ltd.

sACN Connection

Also known as ANSI E1.31, streaming ACN is an Ethernet protocol that uses the layering and formatting of Architecture for Control Networks to transport DMX512 data over IP or any other ACN compatible network.

Connection Diagram

The three LED indicators in between the ethernet through ports indicate a connection to a network and activity on that network. They do not indicate whether or not the Maverick Storm 2 BeamWash is receiving a signal from a controller.

Remote Device Management

Remote Device Management, or RDM, is a standard for allowing DMX-enabled devices to communicate bi-directionally along existing DMX cabling. Check the DMX controller's User Manual or with the manufacturer as not all DMX controllers have this capability. The Maverick Storm 2 BeamWash supports RDM protocol that allows feedback to make changes to menu map options.

USB Software Update

The Maverick Storm 2 BeamWash allows for software updates with a USB device using the built-in USB port. To update the software using a USB flash drive, do the following:

1. Power on the product, and plug the flash drive into the USB port.
2. Once the flash drive has been detected, the message **"USB UPDATE"** will be displayed. Select **YES**.
3. The next screen will show the software versions available for this fixture on the USB drive. For multiple versions of the software for the same fixture, use **<UP>** or **<DOWN>** to select the desired version. Press **<ENTER>**.
4. The **"USB UPDATE"** screen will re-appear. Select **YES**.

It is possible to update multiple units with the USB if they are daisy chained via DMX.

5. The upgrade will start. **DO NOT** turn off the power or disconnect the USB while the USB LED is still blinking during the process. The screen display will read: **"USB Update Wait"**. The update can take several minutes to complete.
 - When the USB firmware is done uploading, in some fixtures, the display will change to: **"DO NOT UNPLUG, UPDATING"**.
6. When the update is completed, the fixture will automatically reboot.
7. Go to Fixture Information on the product's menu map and confirm the firmware revision.
8. When the boot-up process is finished, restart the product.
 - **Place the .chl file in the root directory of the USB drive.**
 - **The product's USB port supports up to 32GB capacity and only works with FAT32 file format.**

Turning off the power or removing the USB while the USB LED is still blinking during the update will cause partial or total firmware failure in the targeted fixture(s). If this occurs, the user will need the UPLOAD 08 device to fix this. Please contact Chauvet regarding this device.

Mounting

Before mounting the product, read and follow the safety recommendations indicated in the Safety Notes. For the Chauvet Professional line of mounting clamps, go to <http://trusst.com/products/>.

Orientation

Always mount this product in a safe position, making sure there is adequate room for ventilation, configuration, and maintenance.

Rigging

Chauvet recommends using the following general guidelines when mounting this product.

- Before deciding on a location for the product, make sure there is easy access to the product for maintenance and programming purposes.
- Make sure that the structure and attachment points can support the weight before hanging the product (see the [Technical Specifications](#) for weight information).
- When mounting the product overhead, always use a safety cable. Mount the product securely to a rigging point, whether an elevated platform or a truss.
- When rigging the product onto a truss, use a mounting clamp of appropriate weight capacity.

Procedure

The Maverick Storm 2 BeamWash comes with 2 Omega bracket to which the user can attach a mounting clamp directly. Mounting clamps are sold separately. Make sure the clamps are capable of supporting the weight of this product. Use at least two mounting points per product. For the Chauvet Professional line of mounting clamps, go to <http://www.trusst.com/products>.

Mounting Diagram

4. Operation

Control Panel Description

Button	Name	Function
	<UP>	Navigates upwards through the menu list or increases the numeric value when in a function
	<MENU>	Exits from the current menu or function
	<DOWN>	Navigates downwards through the menu list or decreases the numeric value when in a function
	<LEFT>	Navigates leftwards through the menu list
	<ENTER>	Enables the currently displayed menu or sets the currently selected value into the selected function
	<RIGHT>	Navigates rightwards through the menu list

Battery Powered Display

The Maverick Storm 2 BeamWash has a battery powered display which enables access to the menu when the product is powered off. Press and hold **<MENU>** until the display activates (approximately 15 seconds).

Home Screen

The Maverick Storm 2 BeamWash has a home screen that shows the current control protocols, personalities, starting addresses, IP addresses, and universes. To see the home screen, press **<MENU>** repeatedly until it shows on the display. From the home screen, press **<ENTER>** to reach the main menu.

Control Panel Lock

The setting locks or unlocks the control panel.

1. Go to the **Settings** main level.
2. Select the **Lock Screen** option.
3. Select **NO** (control panel stays unlocked) or **YES** (locks control panel).

When the control panel lock is activated, the product will prompt for the passcode in order to access the menu. Enter the passcode as described below.

Passcode

After being prompted to enter the passcode, enter **0920**.

Technician Mode

The technician mode disables the pan and tilt motors, allowing the output of the product to be aimed by hand. To enable the technician mode of the Maverick Storm 2 BeamWash, hold **<UP>** and **<LEFT>** while the product is powering on. When the product is turned off and back on, the pan and tilt will return to normal function.

Menu Map

Refer to the Maverick Storm 2 BeamWash product page on www.chauvetprofessional.com for the latest menu map.

Settings Configuration

Use control configurations to operate the product with a DMX, WDMX, Art-Net™, sACN, or Kling-Net controller, or with a combination of two protocols.

Control Mode

The Maverick Storm 2 BeamWash can work with a single controller or with 2 controllers running 2 different control protocols. In Dual Control mode, one protocol controls the Movement, and the other protocol controls the Pixels. Single Control mode works with wired DMX, WDMX, Art-Net™, and sACN control signals.

Dual Control Movement works with wired DMX, Art-Net™, and sACN control signals.

Dual Control Pixels works with wired DMX, Art-Net™, sACN, and Kling-Net control signals.

To set the control mode and the protocol(s):

1. Go to the **Control Settings** main level.
2. Select the desired control mode, from **Single Control** or **Dual Control**.
3. For **Dual Control**, select which mode to configure, from **Movement** or **Pixels**.
4. Select the desired protocol, from **DMX**, **ArtNet**, **sACN**, **WDMX** (Single Control only), or **KlingNet** (Dual Control Pixels only).

In Dual Control mode, the Movement protocol and the Pixels protocol cannot be the same.

- See the [WDMX Reset](#) section for further setup of WDMX.
- See the [Network Setup](#) section for further setup of ethernet protocols (Art-Net™ or sACN).

Control Personalities

To set the control personality:

1. Select the control mode and protocol as described under [Control Mode](#).
2. Select the **Personality** option.
3. Select the desired personality from:

Single Control	Dual Control Movement	Dual Control Pixels
Basic (31-channel)	Basic (11-channel)	Basic (93-channel)
Standard (143-channel)	Standard (34-channel)	Standard (112-channel)
Advanced (263-channel)	Advanced (45-channel)	Advanced (224-channel)
Tour (325-channel)		(Kling-Net will only function with Basic or Standard mode)
Basic2 (37-channel)		
Busk (19-channel)		
Basic3 (37-channel)		

- See the [Starting Address](#) section for the highest recommended address for each personality.
- Make sure that the starting addresses on the various products do not overlap due to the new personality setting.

Starting Address

Each product and control mode will respond to a unique starting address from the controller. All products with the same starting address will respond in unison. To set the starting address:

1. Select the control mode and protocol as described under [Control Mode](#).
2. Select the **Start Address** option.
3. Select the starting address (**1–512**).

Control Mode	Personality	Channels	Highest Address
Single Control	Basic	31	482
	Standard	143	370
	Advanced	263	250
	Tour	325	188
	Basic2	37	476
	Busk	19	494
	Basic3	37	476
Dual Control Movement	Basic	11	502
	Standard	34	479
	Advanced	45	468
Dual Control Pixels	Basic	93	420
	Standard	112	401
	Advanced	224	289

Universe

The Art-Net™ and sACN control protocols require a universe address in addition to the starting address. To assign a universe to the control mode when using Art-Net™ or sACN:

1. Select the control mode and protocol as described under [Control Mode](#).
2. Select the **Universe** option.
3. Select the universe (**0–255** for **ArtNet**, or **1–256** for **sACN**).

Network Setup

The Network Setup settings control the IP address and subnet mask of the product.

IP Mode

To choose how the IP address is set:

1. Go to the **Setup** main level.
2. Select the **Network Setting** option.
3. Select the **IP Mode** option.
4. Select the desired IP mode, from **Manual** (to set a custom IP address), **DHCP** (the IP address is assigned by the connected network), or **Static** (the product uses a default, preset IP address).

Manual IP Address

To set the IP address when the **IP Mode** is set to **Manual**:

1. Go to the **Setup** main level.
2. Select the **Network Setting** option.
3. Select the **Ip** option.
4. Set the 4 values of the IP address from **000–255**.

Subnet Mask

To set the subnet mask:

1. Go to the **Setup** main level.
2. Select the **Network Setting** option.
3. Select the **SubMask** option.
4. Set the 4 values of the subnet mask from **000–255**.

Control Channel Assignments and Value

Preset Color HTP

When preset color HTP is on, manual color controls may be used at the same time as preset color controls.

When preset color HTP is off, preset color controls will override all manual color controls.

Test Configuration

The test modes allow all functions of the Maverick Storm 2 BeamWash to be tested automatically or individually.

Automatic Test

To run an automatic test of all product functions:

1. Go to the **Test Mode** main level.
2. Select the **Auto Test** option.

Manual Test

To manually test each function of the Maverick Storm 2 BeamWash:

1. Go to the **Test Mode** main level.
2. Select the **Manual Test** option.
3. Select a function to test, from **Pan**, **Tilt**, **P/T Speed**, **Red1**, **Green1**, **Blue1**, **CTC1**, **Color1**, **Pattern1**, **LED Macro1**, **LED Ma. Speed1**, **LED Ma. Fade1**, **Background1**, **Background1 Dim**, **Dimmer 1**, **Shutter1**, **Red2**, **Green2**, **Blue2**, **White2**, **CTC2**, **Color2**, **Pattern2**, **LED Macro2**, **LED Ma. Speed2**, **LED Ma. Fade2**, **Background2**, **Background2 Dim**, **Dimmer 2**, **Shutter2**, **Function**, or **Zoom**.
4. Increase or decrease the value of the selected function from **000–255** to test it.

Settings Configuration

Pan Reverse

To set the orientation of the pan:

1. Go to the **Setup** main level.
2. Select the **Pan Reverse** option.
3. Select from **NO** (normal pan motion), or **YES** (reversed pan motion).

Tilt Reverse

To set the orientation of the tilt:

1. Go to the **Setup** main level.
2. Select the **Tilt Reverse** option.
3. Select from **NO** (normal tilt motion), or **YES** (reversed tilt motion).

Screen Reverse

To set the orientation of the display:

1. Go to the **Setup** main level.
2. Select the **Screen Reverse** option.
3. Select from **NO** (right-side up), **YES** (upside-down), or **AUTO** (changes depending on the orientation of the product).

Pan Angle

To set the maximum angle of the pan:

1. Go to the **Setup** main level.
2. Select the **Pan Angle** option.
3. Select from **540** (540°), **360** (360°), or **180** (180°).

Tilt Angle

To set the maximum angle of the tilt:

1. Go to the **Setup** main level.
2. Select the **Tilt Angle** option.
3. Select from **260** (270°), **180** (180°), or **90** (90°).

Blackout on Movement

To set the Maverick Storm 2 BeamWash to black out on pan or tilt movement:

1. Go to the **Setup** main level.
2. Select the **BL. O. P/T Move** (blackout on pan or tilt movement) option.
3. Select from **NO** (no blackout on pan/tilt movement), or **YES** (blackout during pan/tilt movement).

Swap Pan and Tilt

To swap the pan and tilt controls for each other:

1. Go to the **Setup** main level.
2. Select the **Swap XY** option.
3. Select from **NO** (do not swap), or **YES** (swap so pan controls tilt and tilt controls pan).

WDMX Reset

To reset the WDMX connection and allow the Maverick Storm 2 BeamWash to connect to a WDMX transmitter:

1. Go to the **Setup** main level.
2. Select the **WDMX Reset** option.
3. Select from **NO** (do not reset), or **YES** (reset the WDMX connection).

Follow instructions in the manual or guide for the WDMX controller being used to connect it to the receiver in the Maverick Storm 2 BeamWash.

Display Backlight Timer

To set the length of time before an inactive display will turn off:

1. Go to the **Setup** main level.
2. Select the **Backlight Timer** option.
3. Select the length of the backlight timer, from **30S** (30 seconds), **1M** (1 minute), **5M** (5 minutes), or **ON** (always on).

Operation

Loss of Data

To set how the product reacts to a loss in control signal data:

1. Go to the **Setup** main level.
2. Select the **Loss of Data** option.
3. Select from **Hold** (holds the last values received before signal loss), or **Close** (blacks out the product).

Fan Mode

To set the fan speed mode:

1. Go to the **Setup** main level.
2. Select the **Fans** option.
3. Select the fan mode, from **Auto** (fan speed adjusts to product temperature), **Full** (fan speed at maximum), or **ECO** (quiet mode).

Color Mixing Mode

To set the color mixing mode:

1. Go to the **Setup** main level.
2. Select the **C Mixing Mode** option.
3. Select from **RGBW** (additive color mixing: add red, green, blue, and white together to mix colors), or **CMY** (subtractive color mixing: remove cyan, magenta, and yellow from the total to mix colors).

Dimmer Curve

To set the dimmer curve:

1. Go to the **Setup** main level.
2. Select the **Dimmer Curve** option.
3. Select the dimmer curve, from **Linear**, **Square**, **LSqua**, or **SCurve**.

Dimmer Speed

To set the dimmer speed:

1. Go to the **Setup** main level.
2. Select the **Dimmer Speed** option.
3. Select the dimmer speed, from **Smooth** or **Fast**.

Pulse Width Modulation

To adjust the frequency of the pulse width modulation:

1. Go to the **Setup** main level.
2. Select the **PWM Option** option.
3. Select the frequency, from **600Hz**, **1200Hz**, **2000Hz**, **4000Hz**, **6000Hz**, or **15000Hz**.

Color Balance

To set the color balance:

1. Go to the **Setup** main level.
2. Select the **Color Balance** option.
3. Select the color level to alter, from **Red**, **Green**, **Blue**, or **White**.
4. Set the maximum value for the selected color (**100–255**).

Calibrated White

To set the white mode:

1. Go to the **Setup** main level.
2. Select the **Calibrated White** option.
3. Select the mode, from **ON** (factory calibrated white balance), **OFF** (uncalibrated full power), or **Custom** (see White Balance).

Color Balance

To set the custom white balance:

1. Go to the **Setup** main level.
2. Select the **White Balance** option.
3. Select the color level to alter, from **Red**, **Green**, **Blue**, or **White**.
4. Set the maximum value for the selected color (**000–255**).

Preset Selection

To select a preset configuration of menu options:

1. Go to the **Setup** main level.
2. Select the **Preset Select** option.
3. Select from **PRESET A** (default), **PRESET B**, or **PRESET C**.
 - **Changes to settings automatically save to the currently selected Preset.**
 - **If no Preset has been selected, changes to settings save to PRESET A.**
 - **After selecting a Preset, the product will restart.**

Preset Synchronization

To transfer saved Presets from one Maverick Storm 2 BeamWash to another:

1. Connect the Maverick Storm 2 BeamWash products to receive the Presets by a DMX daisy chain.
2. Make the Maverick Storm 2 BeamWash with the Presets to transfer the first in the DMX daisy chain.
3. Power on all of the products.
4. Set all of the products to a [Control Mode](#) other than **WDMX** or **KlingNet**. (**DMX**, **ArtNet**, or **sACN**)
5. On the Maverick Storm 2 BeamWash with the Presets, go to the **Setup** main level.
6. Select the **Preset Sync** option.
7. Select **NO** (to cancel) or **YES** (to transfer the Presets to the connected products).

- **All menu configurations are transferred except for the IP address.**
- **ONLY connect Maverick Storm 2 BeamWash products for this function!**

TV Reset Mode

TV Reset Mode sets the product to reset more quietly. To enable or disable TV Reset Mode:

1. Go to the **Setup** main level.
2. Select the **TV Reset Mode** option.
3. Select **NO** (to disable) or **YES** (to enable).

Reset Function

To reset specific functions or the entire product:

1. Go to the **Setup** main level.
2. Select the **Reset Function** option.
3. Select the functions to reset, from:
 - **Pan/Tilt**
 - **Zoom**
 - or
 - **All**
4. Select **NO** (to cancel) or **YES** (to reset the selected functions).

Factory Reset

To reset the product to factory settings:

1. Go to the **Setup** main level.
2. Select the **Factory Settings** option.
3. Select **NO** (to cancel) or **YES** (to reset the product configuration).

System Information

The information section of the menu displays statistics and the current status of the product's various functions. To view these information sections:

1. Go to the **Sys Info** main level.
2. Select which information to view, from **Fixture Information** (shows the firmware version, running mode, addresses, temperature, running time, and network addresses), **Fan Information** (shows the speed of the fans in rotations per minute (rpm)), **Error Information** (shows any error or No Error!), or **Channel Information** (shows the current values of all signal input channels).
3. If necessary, scroll up and down to view all information available in the selected option.

Operation

Zero Adjust Mode

The Zero Adjust Mode provides fine adjustments for the home position of every moving part in the optical path as well as the pan and tilt movements. To adjust these options and prevent borders showing or reduction of the light output:

1. From the home screen, press and hold **<MENU>** until the passcode screen appears.
2. Enter the passcode: **2323** and press **<ENTER>**.
3. Select the “zero” position to adjust, from **PAN**, **TILT**, **ZOOM**, **MAC4**, **MAC5**, **MAC6**, **RDM4**, **RDM5**, or **RDM6**.
4. Adjust the “zero” position for the selected function from **000–255**.

Web Server

The Maverick Storm 2 BeamWash Web Server can be accessed by any computer on the same network as the product. It allows network access to system information, settings such as control setup, manual testing of all functions, firmware updates, and the ability to change the Web Server password.

1. Connect the product to power, and set the [Control Mode](#) to **ArtNet** and the [IP Mode](#) to **Static**.
2. Connect the product to a Windows computer with a network cable.
3. On the computer, set the first value of the IP address of the new network to match the first value of the IP address of the product. The IP address of the product is displayed on the [Home Screen](#).
4. Enter the IP address of the product into the URL bar of a web browser on the computer.
5. Enter both the User Name and Password as **admin** to log in.

Information

The Information page on the Web Server displays the current settings and the system information of the Maverick Storm 2 BeamWash.

Setup

The Setup page on the Web Server provides options for control, similar to the **Setup** menu on the product. Click **Save Settings** to send the new configuration to the product.

Manual Test

The Manual Test page on the Web Server allows all output functions of the product to be controlled through the browser. To set all functions back to default, click **Reset**.

Firmware Update

The Upgrade page on the Web Server allows the product to be updated with the latest firmware. Go to <https://www.chauvetprofessional.com> to download firmware updates.

Security

The Security page on the Web Server gives the option to change the password to the connected product's web server. Enter the old password (**admin**, by default) and the new password twice, then click **Save Settings** to change the password.

5. Maintenance

Product Maintenance

Dust build-up reduces light output performance and can cause overheating. This can lead to reduction of the light source's life and/or mechanical wear. To maintain optimum performance and minimize wear, clean this product at least twice a month. However, be aware that usage and environmental conditions could be contributing factors to increase the cleaning frequency.

To clean the product, follow the instructions below:

1. Unplug the product from power.
2. Wait until the product is at room temperature.
3. Use a vacuum (or dry compressed air) and a soft brush to remove dust collected on the external surface/vents.
4. Clean all transparent surfaces with a mild soap solution, ammonia-free glass cleaner, or isopropyl alcohol.
5. Apply the solution directly to a soft, lint free cotton cloth or a lens cleaning tissue.
6. Softly drag any dirt or grime to the outside of the transparent surface.
7. Gently polish the transparent surfaces until they are free of haze and lint.

Always dry the transparent surfaces carefully after cleaning them.

Do not spin the cooling fans with compressed air. Damage may result.
